Remington 870 Breaching Shotgun

How to Install ?

FiveM :

Drag and drop the "breacher" folder somewhere in your folder hierarchy on your server and now go to the server.cfg and add a new line called "ensure breacher".

Ingame you can spawn your weapon with the name "weapon_sawnoffshotgun"

I recommend to use a command to give you the weapon or vMenu.

SP :

Place the files in

update\x64\dlcpacks\patchday8ng\dlc.rpf\x64\models\cdimages\weapons.rpf
